This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

The CHILDES Project: The database

\ "The CD-Rom includes the transcript files described in volume II\" --Page 4 of cover.

The Childes Project

Volume I is the first of two volumes that document the three components of the CHILDES Project. It is divided into two parts which provide an introduction to the use of computational tools for studying language learning. The first part is the CHAT manual, which describes the conventions and principles of CHAT transcription and recommends specific methods for data collection and digitization. The second part is the CLAN manual, which describes the uses of the editor, sonic CHAT, and the various analytic commands. The book will be useful for both novice and experienced users of the CHILDES tools, as well as instructors and students working with transcripts of child language. Volume II describes in detail all of the corpora included in the CHILDES database. The conversational interactions in the corpora come from monolingual children and their caregivers and siblings, as well as bilingual children, older school-aged children, adult second-language learners, children with various types of language disabilities, and aphasic recovering from language loss. The database includes transcripts in 26 different languages.

Forensic Science and Humanitarian Action

Widens traditional concepts of forensic science to include humanitarian, social, and cultural aspects Using the preservation of the dignity of the deceased as its foundation, Forensic Science and Humanitarian Action: Interacting with the Dead and the Living is a unique examination of the applications of humanitarian forensic science. Spanning two comprehensive volumes, the text is sufficiently detailed for forensic practitioners, yet accessible enough for non-specialists, and discusses both the latest technologies and real-world interactions. Arranged into five sections, this book addresses the 'management of the dead' across five major areas in humanitarian forensic science. Volume One presents the first three of these areas: History, Theory, Practice, and Legal Foundation; Basic Forensic Information to Trace Missing Persons; and Stable Isotopes Forensics. Topics covered include: Protection of The Missing and the Dead Under International Law Social, Cultural and Religious Factors in Humanitarian Forensic Science Posthumous Dignity and the Importance in Returning Remains of the Deceased The New Disappeared – Migration and Forensic Science Stable Isotope Analysis in Forensic Anthropology Volume Two covers two further areas of interest: DNA Analysis and the Forensic Identification Process. It concludes with a comprehensive set of case studies focused on identifying the deceased, and finding missing persons from around the globe, including: Forensic Human Identification from an Australian Perspective Skeletal Remains and Identification Processing at the FBI Migrant Deaths along the Texas/Mexico Border Humanitarian Work in Cyprus by The Committee on Missing Persons (CMP) Volcán De Fuego Eruption – Natural Disaster Response from Guatemala Drawing upon a wide range

of contributions from respected academics working in the field, Forensic Science and Humanitarian Action is a unique reference for forensic practitioners, communities of humanitarian workers, human rights defenders, and government and non-governmental officials.

The Role of Technology in Clinical Neuropsychology

Neuropsychology as a field has been slow to embrace and exploit the potential offered by technology to either make the assessment process more efficient or to develop new capabilities that augment the assessment of cognition. *The Role of Technology in Clinical Neuropsychology* details current efforts to use technology to enhance cognitive assessment with an emphasis on developing expanded capabilities for clinical assessment. The first sections of the book provide an overview of current approaches to computerized assessment along with newer technologies to assess behavior. The next series of chapters explores the use of novel technologies and approaches in cognitive assessment as they relate to developments in telemedicine, mobile health, and remote monitoring including developing smart environments. While still largely office-based, health care is increasingly moving out of the office with an increased emphasis on connecting patients with providers, and providers with other providers, remotely. Chapters also address the use of technology to enhance cognitive rehabilitation by implementing conceptually-based games to teach cognitive strategies and virtual environments to measure outcomes. Next, the chapters explore the use of virtual reality and scenario-based assessment to capture critical aspects of performance not assessed by traditional means and the implementation of neurobiological metrics to enhance patient assessment. Chapters also address the use of imaging to better define cognitive skills and assessment methods along with the integration of cognitive assessment with imaging to define the functioning of brain networks. The final section of the book discusses the ethical and methodological considerations needed for adopting advanced technologies for neuropsychological assessment. Authored by numerous leading figures in the field of neuropsychology, this volume emphasizes the critical role that virtual environments, neuroimaging, and data analytics will play as clinical neuropsychology moves forward in the future.

Discretionary Behavior and Performance in Educational Organizations

Examines discretionary behavior/performance, phenomenon for educational organizations to be effective in responding to the complex expectations of the 21st century. This title refers to the employee behavior that is not directly or explicitly recognized by the formal reward system, and in the aggregate promotes the functioning of the organization.

Occupational Therapy for Mental Health

Person-centered, recovery-oriented, occupation-based Here's practical information on the theories, evidence, assessments, and interventions that are crucial to effective occupational therapy mental health practice. Students will gain an understanding of the lived experience and an evidence-based, recovery-oriented perspective with guidance on how to be a psychosocial practitioner in any setting. They'll understand the recovery process for all areas of an individual's life—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

Effectiveness of No Child Left Behind Law

Internet Use in the Aftermath of Trauma

Melbourne during the depression. A seedy, corrupt city. Someone has struck at the heart of Australia's soul: they have killed the horse that would have won the Melbourne Cup. For what motive? Profit, blackmail, a betting scam? Only Tom Pink, the rider of the murdered horse can find out. Tom, born into the underworld he now tries to defeat, exposes graft and blackmail that reaches to the upper echelons of Melbourne society. His life and the lives of those he holds close will never be the same again. The Great Melbourne Cup Mystery, written in 1933, a year after the mysterious death of Phar Lap (winner of the 1930 Melbourne Cup) is a previously lost classic of Australian crime fiction.

SRS Research Information System Index: Facilities through Young adults

Technological advancement in graphics and other human motion tracking hardware has promoted pushing \"virtual reality\" closer to \"reality\" and thus usage of virtual reality has been extended to various fields. The most typical fields for the application of virtual reality are medicine and engineering. The reviews in this book describe the latest virtual reality-related knowledge in these two fields such as: advanced human-computer interaction and virtual reality technologies, evaluation tools for cognition and behavior, medical and surgical treatment, neuroscience and neuro-rehabilitation, assistant tools for overcoming mental illnesses, educational and industrial uses. In addition, the considerations for virtual worlds in human society are discussed. This book will serve as a state-of-the-art resource for researchers who are interested in developing a beneficial technology for human society.

Rodrigo Santos teve todos os motivos para desistir de viver depois de sofrer uma lesão completa de medula na c5 (quinta vértebra do pescoço); mas prosseguiu acreditando, e mais: sendo exemplo para todos e todas nós. Por isso, estamos diante de uma obra autobiográfica capaz de nos conduzir a diversas reflexões importantes de como encararmos a existência com leveza, serenidade e gratidão, mesmo diante de qualquer dor aguda, trauma ou desafio extremo que naturalmente cause sofrimento. Com bastante honestidade aos fatos que marcaram sua vida desde o acidente que o deixou tetraplégico, o autor relata os seus sentimentos e vivências a partir de uma linguagem bastante clara, recheada de bom humor, revelando a sabedoria de quem aprendeu que o sofrer pode ser ressignificado a partir de valores/bases essenciais como a família, as verdadeiras amizades e o cultivo da paz. Das internações às altas, dos preconceitos quanto aos impedimentos de longo prazo (impostos pela sociedade) às superações de cada dia, Rodrigo nos brinda com uma autobiografia cheia de ensinamentos, tanto para pessoas com algum tipo de deficiência como para quem não as têm. Nem as caras placas de titânio, para cuja aquisição houve mobilizações de familiares, amigos/as e desconhecidos/as, nem as fortes dores em seu corpo no pré e pós-acidente ocorrido há mais de 18 anos, nem

suas naturais dúvidas ante algumas esperas aparentemente inexplicáveis... Nada disso o fez perder a fé em Deus. É por isso que o autor, cuja apaixonada vida é um milagre e cuja alma é sorridente, está aqui para nos contar esta história extraordinária, surpreendente. Enézio de Deus Silva Júnior

Virtual Reality

Que réserve la vie après la mort ? Olivia, quatre-vingt-deux ans, est sur le point de le découvrir. Elle n'a aucun souvenir de sa vie et aucune idée de ce qui l'attend pour la seconde partie de son existence. Accompagnée d'Imane, son agente d'accueil, Olivia va découvrir les douze options qui s'offrent à elle pour passer le reste de sa mort. De chemin en chemin, de souvenir en souvenir, Olivia et Imane nous entraînent dans la découverte de l'après-vie et la redécouverte de la vie. Quel sera le choix d'Olivia ?

SRS Research Information System Index

This comprehensive and groundbreaking text provides an indispensable guide to the application of key theories, models, and concepts informing occupational therapy's professional practice. It includes contributions from a range of international scholars and addresses practice with individuals, groups, and communities. This book also features theories underpinning professional education. Each chapter includes the theoretical core as well as evidence supporting the validity, reliability, and clinical effectiveness of the particular theoretical approach or model, giving readers an insightful overview of the evidence available to determine the effect of interventions based on that theory. Chapters also include case examples that illustrate application as well as sections offering constructive critique and possible future directions for further development of the theories. This comprehensive, wide-ranging volume is the ideal resource for using theory as a tool for practice by occupational therapy practitioners, students, and educators.

The Impact of Virtual and Augmented Reality on Individuals and Society

Dictionary of 7000 Ashkenazic given names from the 11th century to the present. Names are traced to specific localities at specific times. Includes a history of Yiddish and a history of Ashkenazic Jews and their migrations. Also includes information of borrowings from non-Jewish groups.

The Victorian Reports

This exciting collection tours virtual reality in both its current therapeutic forms and its potential to transform a wide range of medical and mental health-related fields. Extensive findings track the contributions of VR devices, systems, and methods to accurate assessment, evidence-based and client-centered treatment methods, and—as described in a stimulating discussion of virtual patient technologies—innovative clinical training. Immersive digital technologies are shown enhancing opportunities for patients to react to situations, therapists to process patients' physiological responses, and scientists to have greater control over test conditions and access to results. Expert coverage details leading-edge applications of VR across a broad spectrum of psychological and neurocognitive conditions, including: Treating anxiety disorders and PTSD. Treating developmental and learning disorders, including Autism Spectrum Disorder, Assessment of and rehabilitation from stroke and traumatic brain injuries. Assessment and treatment of substance abuse. Assessment of deviant sexual interests. Treating obsessive-compulsive and related disorders. Augmenting learning skills for blind persons. Readable and relevant, *Virtual Reality for Psychological and Neurocognitive Interventions* is an essential idea book for neuropsychologists, rehabilitation specialists (including physical, speech, vocational, and occupational therapists), and neurologists. Researchers across the behavioral and social sciences will find it a roadmap toward new and emerging areas of study.

Issues in Mental Health Research and Practice: 2011 Edition

The go-to guide for nearly 50 years for occupational therapists working with adults with visual, perceptual, and cognitive deficits after brain injury is back for a Fifth Edition. Zoltan's Vision, Perception, and Cognition: Evaluation and Treatment of the Adult With Acquired Brain Injury, Fifth Edition maintains the core foundation laid in previous editions while drawing upon Drs. Tatiana A. Kaminsky and Janet M. Powell's 60-plus years combined of clinical, teaching, and research experience in adult neuro-based rehabilitation. This best-selling text translates the available research and theory into application for practice. The result is a comprehensive, accessible, up-to-date, and evidence-informed textbook with a strong occupation-based focus, detailing occupational therapy evaluation and treatment practices for adults with visual, perceptual, and cognitive deficits after brain injury. What's new in the Fifth Edition: An emphasis on functional cognition, occupational focus, and changes in approaches to rehabilitation Clinical examples from adult neurorehabilitation to ease understanding Up-to-date evidence and everyday technology implementation Tips for collaborating with a team of practitioners New case examples Included with the text are online supplemental materials for faculty use in the classroom. Zoltan's Vision, Perception, and Cognition: Evaluation and Treatment of the Adult With Acquired Brain Injury, Fifth Edition includes key updates to stay current while maintaining the essence of its previous editions.

Transcript of the Enrollment Books

The two-volume set LNCS 10273 and 10274 constitutes the refereed proceedings of the thematic track on Human Interface and the Management of Information, held as part of the 19th HCI International 2017, in Vancouver, BC, Canada, in July 2017. HCII 2017 received a total of 4340 submissions, of which 1228 papers were accepted for publication after a careful reviewing process. The 102 papers presented in these volumes were organized in topical sections as follows: Part I: Visualization Methods and Tools; Information and Interaction Design; Knowledge and Service Management; Multimodal and Embodied Interaction. Part II: Information and Learning; Information in Virtual and Augmented Reality; Recommender and Decision Support Systems; Intelligent Systems; Supporting Collaboration and User Communities; Case Studies.

The South African Law Reports

Posttraumatic stress disorder (PTSD) is a common and disabling condition that often goes undiagnosed for years, and even when the diagnosis is made, treatment is frequently ineffective, especially for combat veterans. Cognitive behavioural therapy with imaginal exposure is considered first-line treatment, but many cannot or will not engage in imaginal exposure, which is not surprising, since avoidance of reminders of the trauma is a defining feature of PTSD. Novel technologies offer an alternative to facilitate exposure therapy, through virtual reality (VR). This book outlines state-of-the-art approaches to improving the diagnosis and treatment of PTSD, with a particular emphasis on the promise and pitfalls associated with VR exposure therapy. The world's leading experts in this cutting edge field describe their VR work in phobias and other mental disorders, and chart a course for future studies to improve the diagnosis and treatment of PTSD.

Alma sorridente

This revision of a well-loved text continues to embrace the confluence of person, environment, and occupation in mental health as its organizing theoretical model, emphasizing the lived experience of mental illness and recovery. Rely on this groundbreaking text to guide you through an evidence-based approach to helping clients with mental health disorders on their recovery journey by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

Une mort et 12 chemins

The offsite and modular market is continuing to grow. This book builds on the success of a number of initiatives, including formative findings from literature, research and development and practice-based evidence (success stories). It presents new thinking and direction from leading experts in the fields of: design, process, construction, engineering, manufacturing, logistics, robotics, delivery platforms, business and transformational strategies, change management, legislation, organisational learning, software design, innovation and biomimetics. This book is particularly novel and timely, as it brings together a number of cogent subjects under one collective 'umbrella'. Each of these chapters contain original findings, all of which culminate in three 'Key Learning Points' which provide new insight into the cross-cutting themes, interrelationships and symbiotic forces that exist between each of these chapters. This approach also provides readers with new contextualised understanding of the wider issues affecting the offsite market, from the need to embrace societal challenges, through to the development of rich value-laden solutions required for creating sector resilience. Content includes a balance between case studies and practice-based work, through to technical topics, theoretical propositions, pioneering research and future offsite opportunities ready for exploitation. This work includes: stakeholder integration, skills acquisition, new business models and processes, circularity and sustainable business strategies, robotics and automation, innovation and change, lean production methodologies and new construction methods, Design for Manufacturing and Assembly, scaled portfolio platforms and customisability, new legal regulatory standards and conformance issues and offsite feasibility scenario development/integration.

The Victorian Law Reports

The use of technology and teaching techniques derived from technology is currently a burgeoning topic in higher education. Teachers at all levels and types of institutions want to know how these new technologies will affect what happens in and outside of the classroom. Many teachers have already embraced some of these technologies but remain uncertain about their educational efficacy. Other teachers have waited because they are reluctant to try tools or techniques that remain unproven or, as is often the case, lack institutional support. This book is designed to help both groups, so that those with technological expertise can extend their knowledge, while technological novices can \"ramp up\" at their own pace and for their own purposes. Best Practices for Technology-Enhanced Teaching and Learning brings together expert teacher-scholars who

apply and assess technology's impact on traditional, hybrid or blended, or completely on-line courses, relying on technology as a teaching tool for classroom management and interaction (e.g., Blackboard, PowerPoint, student response or "clicker systems," multimedia tools), as well as student-based uses of technology largely independent of instructors (e.g., social networking on popular sites including Facebook and MySpace). Each chapter will address how technological improvements can be connected to assessment initiatives, as is now routinely advocated in psychology and social science education. The book features current scholarship and pedagogy involving innovative technology that impacts on student learning in psychology and related disciplines, focusing also on student reactions to these novel technologies, and proper assessments of how well they promote learning. This text will serve as the standard reference on emerging technologies for undergraduate instructors.

Routledge Companion to Occupational Therapy

Intends to examine the focus and aims that drive rehabilitation intervention and technology development. This book addresses the questions of what research is taking place to develop rehabilitation, applied technology and how we have been able to modify and measure responses in both healthy and clinical populations using these technologies.

Assessments in Occupational Therapy Mental Health: An Integrative Approach, Fourth Edition is a unique compilation of mental health assessments that are taught in occupational therapy academic programs and used in clinical practice. This highly anticipated Fourth Edition provides the occupational therapy student and educator with knowledge about the evaluation process, assessments that are current and accurate, and how to generate research for developing assessment tools. Assessments in Occupational Therapy Mental Health, Fourth Edition by Drs. Barbara J. Hemphill and Christine K. Urish, along with more than 30 world-renowned contributors, includes 15 new assessments, along with updates to 9 assessments from the previous editions. Also incorporated throughout the text is the AOTA's Occupational Therapy Practice Framework, Third Edition. Each chapter includes: A theoretical base on the assessment including historical development, rationale for development, behaviors assessed, appropriate patient use, review of literature, and assessment administration How the instrument is administered, which includes the procedure, problems with administering, and materials needed The presentation of a case study and interpretation of results Statistical analysis and recent studies Suggestions for further research to continue the development and refinement of assessments in occupational therapy mental health New to the Fourth Edition: Kawa Model Assessment Spirituality Model of Human Occupation Assessments Assessments Measuring Activities of Daily Living Some of the topics included in the Fourth Edition: Evidence-based practice The interviewing process Psychological assessments Cognitive assessments / learning assessments Behavioral assessments Biological and spiritual assessments While introducing new assessments and updated information, Assessments in Occupational Therapy Mental Health: An Integrative Approach, Fourth Edition is ideal for occupational therapy faculty, students, practitioners, as well as nurses, psychologists, and social workers.
